Claims 22-32 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for calcification scoring from CT scout images, does not reasonably provide enablement for calcification scoring from any and all other types of images. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to practice the invention commensurate in scope with these claims.

Applicant's arguments filed May 9, 2005 have been fully considered but they are not persuasive. While applicant asserts that he has provided the best mode of carrying out his invention, this is not germane to the outstanding rejection since the patented claims have not been rejected.

More to the point is that the original disclosure fails to teach that applicant's particular method of calcification scoring can and should be applied to any and all images in addition to CT scout images as recited in rejected claims 22-32. The "coronary images" referred to by applicant that appear on page 1 lines 2 and 3 of the specification are delineated therein as subtypes of computer tomography images, and applicant's assertion that they are something else misrepresents the patent.

Similarly, applicant points to lines 18-25 of page 8 of the specification which discuss figures 6 and 7 and concludes therefrom that this is a reference to images in general, but the brief description of the drawings reveals that figures 6 and 7 depict data from *scout scans*, and applicant's argument is faulty.

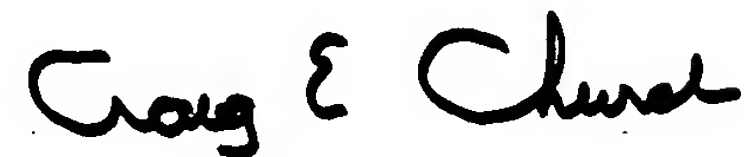

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 2882

In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
